St. Clair County Health Department Lifts Beach Advisory for Lakeside Beach Holland Road Beach Remains Closed

Based on daily water sample collection, E. coli test results show that Lakeside Beach in Port Huron is in the acceptable range and is now open. Holland Road Beach, also in Port Huron, remains closed. All other beaches are open.

Water samples will be collected daily at Holland Road Beach until the E. coli test results are within the acceptable range. In order to remain open, public beaches must meet the State of Michigan's full body contact standards of 300 E. coli bacteria per 100 ml of water.

The St. Clair County Health Department's Environmental Health Division monitors public beaches in St. Clair County for the presence of E. coli bacteria from Memorial Day to Labor Day. Current advisories for St. Clair County's beaches are shared on the SCCHD's 24-hour Water Quality Hotline at 877-504-SWIM, "St. Clair County Beaches" Facebook page, the "MyBeachCast" app, and Michigan BeachGuard website at www.egle.state.mi.us/beach/.

For more information, visit www.stclaircounty.org/Offices/health/bathing.aspx or contact our Environmental Health Division at (810) 987-5306. Follow us on social media @scchdmi.
