St. Clair County Health Department Suspending Walk-in Rapid COVID-19 Testing

Effective immediately, due to temporary limitations in antigen testing supplies and high demand, the St. Clair County Health Department (SCCHD) is suspending “walk-in” rapid COVID-19 testing, until further notice. The Health Department will honor previously scheduled appointments. Laboratory PCR testing remains available at SCCHD with results being called to the client within 48-72 hours. The Health Department is continuing to work diligently to obtain rapid testing supplies.

Due to high call volume, it may also be difficult to get through on the health department phone lines. Please allow up to 48 hours for a returned phone call. Consider emailing COVID questions to COVID19@stclaircounty.org.

COVID-19 testing locations can be found on the health department’s website www.scchealth.co.

COVID-19 updates are available on the health department website www.scchealth.co and on social media @scchdmi.
